DETAILED ACTION

This is an allowance in response to applicant's amendment filed on August 13, 2004 for application no. 09/822,435 in which claims 1-13 are presented for examination.

Response to Arguments

Applicant's arguments with respect to claims 1-5 and 9-13 have been considered but are most in view of the new ground(s) of rejection.

Allowable Subject Matter

Claims 1-13 allowed.

The following is an examiner's statement of reasons for allowance:

As stated in the previous office action in regards to the allowability of claims 6-8, the claims teach a method for contrast stretching in a DCT domain. The method includes separate processes for performing the contrast stretching on intrablocks and interblocks. Chen teaches a method of performing only one method of contrast stretching without detecting if the block is an intrablock or an interblock ("Introduction" and "Contrast manipulation").

The applicant's amendment incorporates the separate processes for intrablocks and interblocks into the independent claims 1 and 9. The claims therefore overcome the prior art of Chen.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
